

Cool Control

Cool Control

Make sure your milk stays cool all day long. Durable and CFC-free, the Peltier cooling principle used in the Cool Control from JURA cools milk to 25 °C below the ambient temperature. Once a temperature of 4 °C has been reached, the intelligent appliance keeps the milk in the optimum temperature range, which prevents it from freezing but also helps to save energy. The top quality stainless steel container holds more than a litre and can be easily removed, refilled, cleaned or, if necessary, kept in the fridge. But the compact Cool Control is not only incredibly functional; with its typically JURA design, it is the perfect complement to the machine.

Technical data

Cooling effect (ΔT) of more than 25 °C	■
Controlled cooling at an optimum 4 °C	■
Energy-saving thanks to automatic temperature control	■
Milk never freezes	■
Virtually silent in operation	■
Ideal for all JURA models	■
Optical cooling display	■
Inner container made of stainless steel	■
Capacity	1.2 l
Dimensions (B x H x D)	15 x 21 x 21 cm
Voltage	100 – 240 V AC
Output	20 W
Tests	  
Article number Cool Control white	67082
Article number Cool Control black	67081
