Dear Customer,

Thank you for the confidence that you have placed in us by purchasing our Deluxe milk container. To ensure that your milk container works perfectly, please read these instructions through carefully and keep them in a safe place for future reference.

- The Deluxe milk container is dishwasher-proof.
- Wash the Deluxe milk container thoroughly before using it for the first time.
- Before making a milk speciality always ensure that there is a sufficient quantity of milk in the Deluxe milk container.
- The Deluxe milk container is supplied with a hose set comprising two hoses with a length of 80 mm (with a connection nipple at one end) and a hose with a length of 360 mm. The longer hose can be used to place the container further away from the machine. It can also be cut into three spare hoses with a length of 120 mm (Fig. 1). Fit the connection nipple as shown in Fig. 2.
- Please note that the intake tube with the notch must first be inserted into the bottom section of the lid (Fig. 3), and the smaller tube including the milk hose (Fig. 4) can be inserted into the upper opening of the lid (Fig. 5). Finally place the lid with the intake tube onto the milk container (Fig. 6).
- Always clean the Deluxe milk container after use. Dismantle the milk container as shown in Fig. 7 and rinse the parts with clean water, using a liquid detergent if necessary.
